

# BOUNDLESS OPTIONS. THE NEW COOL CARRIER DUOPLEX GFK.

*Flexible in operation - also available as through-loading road train*

THE NEW FIXED STRUCTURE FOR ARTICULATED ROAD TRAINS FROM KRONE COMPLETES THE COMPANY'S RANGE OF INSULATED BOX BODY VEHICLES. THE TRIED AND TESTED BODY BOX SUPERSTRUCTURE FROM THE DUOPLEX GFK RANGE IS USED HERE. DISCOVER THE EFFICIENCY OF THE WELL-ENGINEERED ARTICULATED ROAD TRAIN COMBINATIONS - ROBUST AND EFFICIENT TO THE SMALLEST DETAIL. IT PROVIDES THE RIGHT SOLUTION FOR EVERY TRANSPORT TASK.

The powerful Cool Carrier and Cool Bodies from KRONE are manufactured from glass fibre reinforced plastic panels, tailor-made for heavy duty usage in temperature-controlled goods transport - just as users will be familiar with from the Cool Liner Duoplex GFK. Available as 2-axle or 3-axle drawbar trailers as well as in a central axle design. Also suitable for the majority of the motor vehicles available. High maintenance of value and low life cycle costs are also a key focus here, as KRONE has relied solely on standard components from well-known manufacturers in the construction. This means you have the security of being able to trust recognised brand quality and knowing that a replacement part will always be available anywhere without problems should the need arise. Smooth facings are ideal for fitting decals, easy

to clean, simple and quick to repair.

The comprehensive range of accessories leaves nothing to be desired. Whether you need side doors, tail lifts, telematics, doubledeck, multitemp or meat hang hooks, you will find the right equipment for every transport solution. Naturally we also consult with you on the lengths of your road train combination according to your requirements. This means that box body superstructures are available to you in lengths of 6,100 to 10,000 mm. Naturally all this is also available as a through-loading road train with a front wall as a container door or as a roller shutter. Ideal for distribution transport.

 **KRONE**

*We Deliver the Future*

**Good combinations.**

Road train combinations with drawbar trailers (2-axle and 3-axle) or central axle trailers are available in combination with a wide variety of lengths for motor vehicles. These include various types of through-loading road trains and a variety of matching tail lifts.

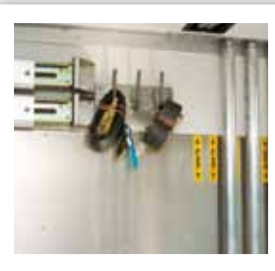

**Various through-loading options.**

The use of through-loading road trains offers considerable flexibility. For this purpose, the front wall of the Cool Carrier can be fitted with a container door or a roller shutter.

**Equipment conforming to HACCP**

The range includes a comprehensive choice of internal fittings, in accordance with HACCP, as users will be familiar with from the Cool Liner Duoplex GFK.

**Readily available at all times.**

There are storage options for load securing bars and rods, straps, etc. This means that your accessories are ready to hand at all times.

**Rollover ramp.**

An optional aluminum rollover ramp permits seamless through-loading from box body to box body.

**Safe support.**

Solid rubber buffers offer a safe support for tail lifts during the loading process.

**Cooling units.**

KRONE supplies a variety of cooling units, including underfloor devices, for every application.
